

Architecture and Design Project Ideas

No matter what industry you are in, any business field can benefit from utilizing interns to their fullest potential. One of the many myths about internships is that employers cannot find the time to delegate meaningful work to their interns. The reality is that through thoughtful organization, a great number of assignments and tasks can be given to interns to save employers both time and labor. Below is a list of responsibilities, or “real work,” that interns can do in the architecture and design field:

- Conduct basic research tasks relating to the department's exhibitions and collections
- Perform research for (insert architecture-related concept)
- Produce AutoCAD drawings
- Participate in design solution review meetings
- Assist in preparing schematic design, design development
- Assist in preparing construction document design drawings, sketches and models
- Assist with research and data collection and collation on specified projects
- Solicit price quotations on small projects
- Provide master plan assistance
- Display design and construction
- Prepare landscape plans
- Prepare vegetative management plans
- Prepare reports, correspondence, and purchase orders
- Build a data maintenance tool for the architecture database
- Assist with web publishing and simple web-based application development
