

Science Project Ideas

No matter what industry you are in, any business field can benefit from utilizing interns to their fullest potential. One of the many myths about internships is that employers cannot find the time to delegate meaningful work to their interns. The reality is that through thoughtful organization, a great number of assignments and tasks can be given to interns to save employers both time and labor. Below is a list of responsibilities, or “real work,” that interns can do in the science field:

- Assist in the laboratory
- Help with laboratory up-keep
- Prepare lab reports
- Gather materials in preparation for labs or experiments
- Help with experimental procedures
- Conduct research that will help in the implementation of an experiment
- Become trained and proficient in chemical and physical analysis
- Carry out chemical and physical analysis in needed aspect of the chemistry laboratory operation
- Maintain laboratory equipment
- Maintain laboratory operation area
- Maintain proper records
- Follow safe work guidelines and proper lab GLP's
- Assist in teaching labs to students
- Casework observation
